Professionals

See DisCopyLabs.

Professionals are dedicated specialists, experts who deliver high quality performance all the time.

The professionals at DisCopyLabs are experts at duplicating data cartridges and computer tape, making DisCopyLabs the largest and fastest growing independent software manufacturer in Silicon Valley.

We were the first duplicator to copy tape cartridges and tape reels, including the TK50 1/2-inch cartridge. We also specialize in 1/4-inch cartridges in QIC 11/24, QIC 120/150 formats and HP format; 8 mm Helical Scan cartridges; 1/2-inch nine-track tapes on 600-, 1200-, and 2400-foot reels (1600 and 6250 BPI) and Bernoulli cartridges. Please call for other formats, such as erasable optical, IBM 3480 or DAT.

Our commitment to zero defect manufacturing provides consistently high reliability right across DisCopyLabs' entire product line.

We have invested substantially in state-of-the-art production and quality assurance equipment and procedures.

Our people are trained to produce perfect copies every time, whether the order involves five or 5000 copies.

Toward the goal of zero defects, we manage our people, but we baby our equipment.

It's standard operating procedure for us to clean tape drive heads every two hours and run an extensive performance test on the same drives every day.

We also test the first few copies of media at the beginning of each day for the proper signal amplitude.

Then, every month, we totally re-align all drives to much tighter tolerances than our customers' own use typically requires. After 700 hours of duplication we complete a full maintenance evaluation on the tape duplication systems.

Hundreds of our customer will tell you that we'll do whatever it takes to achieve maximum customer satisfaction, not just for our large customers, but for start-ups as well.

So for all your software manufacturing, see The Professionals.

DisCopyLabs: A One-Stop Quality Resource For All Your Duplication Needs

DisCopyLabs is the largest independent diskette and tape software manufacturer in California and one of the largest in the country.

The company grew to its leadership position on the strength of the overall added-value and quality it provides its clients. We specialize in turnkey software production services.

Our truly full-service operations reduce customers' labor, equipment and space requirements, freeing them to be professionals in what they do best -- develop software.

Our turnkey capabilities include ordering, receiving and inventorying raw materials, as well as packaging and product distribution.

We have copy protection systems for software that run on the IBM PC, AT and compatibles, Macintosh, and local area networks.

Compare the full turn-key services we offer as part of our package:

- ☐ Free consultation on duplication, packaging, and document conversions
- ☐ Free master set-up
- ☐ FAX line for fast ordering and order verification
- ☐ Certified media
- ☐ Custom serialization and labeling
- ☐ Copy protection
- ☐ Electronic mail for production orders and inventory
- ☐ Shipping and fulfillment
- ☐ Warehousing and inventory control
